from a group consisting of printing, e-mailing, archiving and downloading data from the ~~system~~
camera.
5. (Original) The camera recited in Claim 2 wherein the external device comprises a
printer.
6. (Original) The camera recited in Claim 2 wherein the external device comprises a
computer.
7. (Original) The camera recited in Claim 1 wherein the selectable items comprise
icons.
8. (Original) The camera recited in Claim 1 wherein the selectable items comprise text.
9. (Original) The camera recited in Claim 1 wherein the selectable items are displayable
on the display.

10. (Original) A camera for communicating with an external device, comprising:
a display

a customizable menu that comprises a plurality of selectable items that respectively correspond to selected tasks or actions that may be performed by a user, and which initiate a
5 through connection with the external device, and, when selected, cause the selected task or action to be performed on the external device in a preprogrammed manner; and

apparatus that provides speaking capabilities and which is programmed with a preassigned customized descriptor for each of the selectable items of the menu that represent the respective action performed when a particular item is selected;

10 wherein, when a particular item of the menu is selected, the preassigned customized descriptor associated with that particular item is audiblized using the speaking capabilities.

11. (Original) The camera recited in Claim 10 which comprises a digital camera.

12. (Currently amended) The camera recited in Claim 10 wherein the tasks are selected from a group consisting of printing, e-mailing, archiving and downloading data from the ~~system~~
camera.

13. (Original) The camera recited in Claim 10 wherein the external device comprises a printer.

14. (Original) The camera recited in Claim 10 wherein the external device comprises a computer.

15. (Original) The camera recited in Claim 10 wherein the selectable items comprise icons.

16. (Original) The camera recited in Claim 10 wherein the selectable items comprise text.

17. (Original) The camera recited in Claim 10 wherein the selectable items are displayable on the display.

18. (Original) A method comprising the steps of;
configuring a device to have a display and speaking capabilities;
configuring the device to have a customizable menu system including a menu comprises
a plurality of selectable items that respectively correspond to selected tasks or actions that may
5 be performed by a user;
programming the customizable menu system with a preassigned customized descriptor
for each of the selectable items of the menu that represent the respective action performed when
a particular item is selected; and
10 when a particular item of the menu is selected, audiblizing the preassigned customized
descriptor associated with that particular item using the speaking capabilities.

19. (Original) The method recited in Claim 18 wherein the device is configured to
communicate with an external device, and wherein the selectable items, when selected, cause the
selected task or action to be performed on the external device in a preprogrammed manner.

20. (Original) The method recited in Claim 18 wherein the device comprises a digital
camera.

21. (Original) The method recited in Claim 18 wherein the tasks are selected from a
group consisting of printing, e-mailing, archiving and downloading data from the system.

22. (Original) The method recited in Claim 19 wherein the external device comprises a
printer.

23. (Original) The method recited in Claim 19 wherein the external device comprises a
computer.

24. (Original) The method recited in Claim 18 wherein the selectable items comprise
text.

25. (Original) The method recited in Claim 18 wherein the selectable items comprise
text.

26. (Original) The method recited in Claim 18 wherein the selectable are displayable on
the display.
